Audience:
This course was designed for all health care professionals working with neonates, including: neonatal nurses, labor and delivery nurses, newborn nursery nurses, respiratory and occupational therapists, neonatologists, pediatricians, nurse practitioners, physician assistants, and case managers.

Objectives
By participating in this program, you should be able to:

• Describe the gastrointestinal motility issues for premature infants impacting growth and nutrition.

• Explain how to promote oral feedings while preserving pulmonary functioning.

• Use clinical decision making process to identify and treat rare cases in the NICU

• Explain how communication, or miscommunication, impacts everyone and everything in the workplace.

• Describe the needs & differences of a multigenerational staff.

• Examine how to communicate appropriately through technology.

• Analyze statements said in the NICU with respect to intent, impact and overall effectiveness for family-staff communication.

• Identify the factors impacting the preterm infant GI microbiome and strategies for preserving it.

• Identify factors impacting the term infant GI microbiome and strategies to preserve it.
