Objectives

WHY ATTEND?
The field of infectious disease is an ever changing discipline. This course will provide you with an opportunity to learn updates in the diagnosis and management of relevant infectious diseases in general medical practice. Infectious disease experts will be available for interactive learning sessions during this course.

TARGET AUDIENCE
This course is designed for healthcare professionals including physicians, infection control practitioners, physician assistants, nurses and pharmacists.

GOAL
The goal of this educational activity is to support the right. Use your CE ID number to register for courses, access your CE transcript/credits, and confirm your registration.

LEARNER OBJECTIVES
By participating in this program, you should be able to:

1. Discuss important advances in HIV disease management.
2. Review key updates in the past year in the treatment of HIV infection.
4. Discuss the specific technology available for rapid diagnostic molecular testing.
5. Discuss the specific conditions in which to appropriately use rapid diagnostic molecular testing.
6. Discuss the most relevant Infectious Disease literature over the past few decades.
7. Define health care quality and the process of improving it in the health care environment.
8. Discuss health care quality issues related to infectious diseases.
9. Discuss current epidemiology of sexually transmitted diseases (STDs) in the US and the challenges we face.
10. Discuss important primary care updates in the diagnosis and treatment of STDs.
11. Define the concept and nature of emerging infectious diseases.
12. Discuss relevant updates in Zika infection and other important emerging infectious diseases.
13. Review the history and knowledge about penicillin drugs.
14. Explain the role of penicillin in the rational use of antibiotics in the era of emerging drug resistance.
15. Discuss clinical scenarios when to use penicillin drugs appropriately.
